

## A primary school in **Kenia**

Each Eurotary87 assembly has a social project.  
Our social project is in the north west part of Kenya.

**We are going to build a primary school: five classrooms!**

We work through Wim van den Burg (<http://www.wimvandenburg.nl/>).  
Wim holds a two diamond Paul Harris for service to the community in Africa.

He provides aid bottom up: the local community receives bricks, piping, tiles and all the hardware needed, but at the strict condition that they take care of all the labour. The local community should also commit themselves to the maintenance of the project thereafter.

Providing aid bottom up is essential to achieve change that lasts.  
Dry sandy areas slowly but surely turn into green fertile areas.  
Poverty and illness makes place for happiness and having a future.  
Can a social project be more rewarding?

It is a tradition that clubs that participate to Eurotary87 assembly make a contribution to its social project.  
We hope for your clubs contribution to this fantastic project.

**Paul van Schoonhoven**  
Eurotary87 Chairman 2010
